HS2 & ENERGY
Going beyond the boundary, so you don’t miss a thing

Ensure due diligence for your client’s property transaction ahead of purchase with a Groundsure HS2 and Energy search. This combination report provides insight on the location of both planned and existing energy extraction and generation installations whilst also detailing the proximity of the property to the Crossrail network and proposed High Speed 2 route.

Comprehensive data covers London to Birmingham (Phase One) and Birmingham to Leeds and Manchester (Phase Two) rail networks, and highlights the risk of compulsory purchase for properties deemed too close. Additional features include compensation schemes and the top speed of trains to help assess potential noise pollution.

The report details areas identified for oil and gas extraction including fracking, wind and solar farms and installations, power stations and major energy infrastructure.

**Why do I need this report?**

With an estimated 14 trains an hour, (running up to 225mph) in both directions from London to Birmingham, and from Birmingham to Leeds and Manchester, HS2 is firmly on the agenda for anyone considering the purchase of residential and commercial property within the vicinity.

Homeowners and residential property buyers are becoming increasingly concerned about possible planning impacts from the expansion of energy resources, especially relating to hydraulic fracturing.

This coupled with the threat of disruption, dip in values and compulsory purchase means that clients are looking for a definitive assessment ahead of purchase.

**What does it cover?**

- Identifies whether the property is within 5km of Phase One or Phase Two of the proposed HS2 route and within any compensation areas
- Identifies if a property is within 500m of the Crossrail project
- Identifies if a property is within 25km of planned or existing oil, gas, coalbed methane and shale gas exploration and extraction sites
- Identifies if the property is within 15km of active or planned wind farms
- Identifies if the property is within 15km of active or planned solar farms
- Identifies if the property is within 25km of planned or existing power stations, including nuclear
- Identifies if the property is within 25km of planned or existing large scale energy infrastructure

**Jurisdictions affected by High Speed 2 include:**
